Education

University of Virginia, Charlottesville, VA, United States
Master of Science in Computer Science
University of Mumbai, Mumbai, India
Bachelor of Engineering in Computer Engineering

Aug 2024 – Dec 2025
GPA: 3.94/4.00
Aug 2019 – May 2023
GPA: 3.71/4.00

Professional Experience

Software Development Engineer | Cast Insights Inc, San Francisco, CA Mar 2026 – Apr 2026
Tech Stack: Python, FastAPI, PostgreSQL, Elasticsearch, MCP, RAG, GKE, GCP, Kubernetes, LLMs, OpenAI API, Auth0

- Built Python microservices on GKE for recommendation workflows, ETL orchestration, API integrations, and data processing
- Built an LLM application using RAG, OpenAI APIs, and tool call to extract structured insights from raw content

Data Engineering Research Assistant | UVA Darden School of Business, VA Aug 2025 – Mar 2026
Tech Stack: Python, Machine Learning, Data Engineering, HPC, SLURM, Databricks, Distributed Systems, LLMs, OpenAI API

- Architected fault-tolerant distributed data ingestion systems processing 10TB+ of raw data, improving performance by 70%
- Built robust data ingestion and web scraping systems to collect millions of structured and unstructured financial records
- Developed AI Agents using RAG, Vector Databases, and OpenAI APIs to automate insight extraction from unstructured datasets

Full Stack Development Summer Intern | Rhombus Power Inc., Palo Alto, CA May 2025 – Aug 2025
Tech Stack: PHP, CodeIgniter, Node.js, JIRA, Docker, MVC, ReactJS, Apache Airflow, S3, Vault, HPC, SLURM

- Developed a data solution to parse, predict and generate data from active satellites while reducing general runtime by 40%
- Collaborated on full-stack development across multiple mission-critical applications, ensuring performance, scalability, and security
- Identified and resolved critical issues in production deployments, improving stability and reliability of applications for clients

Founding Software Engineer / Full Stack Engineer | Lab Systems (I) Pvt. Ltd., India Aug 2022 – Jul 2024
Tech Stack: Blockchain, NextJS, Python, Git, Cloudflare, C++, SQL/NoSQL, Flask, Electron, pgVector, vLLM, AWS

- Founding engineer of the Karpuragaurai Development Wing, driving core platform development, and initial technology roadmap
- Architected and implemented a scalable cryptocurrency forensics and disk forensics applications in a startup environment
- Built Frontend and REST API using C++ kernels and Python, enhancing software performance by 70% via distributed processing
- Developed AI-driven forensic agents to automate evidence analysis, anomaly detection, and investigation workflows
- Lead a Product Development team to optimize algorithms and usage of system architecture design to devise solutions for clients
- Streamlined deployment and testing automation by implementing DevOps, optimizing cloud and servers containerization

Patent

D Ein Blockchain-basiertes Medizinlogistiksystem (Granted)

German Patent File No - 20 2023 102 823.3

Date: 19 Sep 2023

Designed a web application for tracking prescription drugs using Blockchain, enabling secure and transparent pharmaceutical supply chain management with improved traceability by 80% and reduced instances of counterfeit drugs in pilot deployments

Relevant Projects

LLM vs LLM Fault Localization Framework | Tech: C++, Gemma 3 12B, PEFT, QLoRA

[Project Link](#)

- Devised a self evolving LLM framework with fault injection and localization to enable scalable automated debugging
- Generated synthetic C++ programs and fine tuned a 12 billion parameter model with QLoRA by leveraging CUDA acceleration

Skills

Programming Languages: Python, SQL, NoSQL, GraphQL, JavaScript, C/C++, CSS, Bash, SASS, PHP

Frameworks & Libraries: Pandas, Polars, Web3, PyTest, ReactJS/NextJS, ExpressJS, GeoPandas, Mocha, TailwindCSS

Development Tools: Cloudflare, AWS, Docker, MongoDB, Flask, Postman, Git/GitHub, Slack, ElasticSearch, Figma, REST APIs, Unit Testing, WAF, CI/CD, JIRA, Redis, Azure, PyTorch, Agile, Klee, Infer, Databricks, Selenium, Neo4j, Claude Code

Relevant Skills: Data Structures & Algorithms, OOP, Data Mining, Data Analytics, Operating Systems, Software Engineering, Human Computer Interaction, Project Management, LLM fine-tuning, Retrieval Augmented Generation (RAG), Agentic AI
